

coachsmart LEV

How to pair the coachsmart LEV with the Turbo LEVO e-bike?

Pairing with the e-bike is not necessary. Just unpack your coachsmart LEV, put in the included battery and turn on your LEVO. As soon as the symbol "E-bi" (stands for e-bike) appears on the display, the e-bike is connected to the device (of course, the e-bike and the coachsmart LEV must be in the immediate vicinity)
