

navi2coach

Which power sources could i use to charge the navi2coach?

The navi2coach should be charged with power sources which are designed for USB devices.

If you'd like to charge the navi2coach during use, you'll need to enable the "USB only charges" option in the system settings. Please note: If you want to read out your navi2coach with your PC you have to switch off the "USB only charges" option. Otherwise your computer will not recognize your navi2coach.
