

Where can I plan a GPX routes or download tracks for navigation?

navi2coach supports the import of GPX track files. Once uploaded they can be used by accessing them via the menu [Navigation > Routes](#).

Websites to plan your own route:

<http://www.bikeroutetoaster.com>

<http://www.naviki.org>

Please note that only the gpx files from gpsies (if you choose "o-synce Track") include navigation hints.

Websites with a lot of routes to download:

<http://www.bikemap.net>

<http://www.gpsies.com>

If these website offer several file formats for their routes please select the GPX-Track format.

If you know other website please do not hesitate to send us an email!
