

How can I create a route which includes turning arrows?

This is currently supported by the website [Gpsies](http://www.gpsies.com) (www.gpsies.com) or the Android application OsmAnd.

More information about Gpsies:

[How to generate a track with manual navigation arrows?](#)

[How to create a track with automatic navigation arrows?](#)

Copy the file into the **Import** folder of your navi2coach. To follow the route just recall it by using the main menu **Navigation -> Routes**.
